DETAILED ACTION

1. Applicant's amendment filed 4/10/03 in Paper No. 13 is acknowledged and entered. Claims 17-92 and 102-105 are canceled by the amendment. Claims 1, 93, and 100 are amended by the amendment. Claims 108-159 are added by the amendment.
2. Claims 1-16, 93-101, and 108-159 are pending.

Election/Restrictions

3. The presently amended claimed invention (Claims 1-16, 93-101, and 108-159) disclosed a plurality of patentably distinct species.

Applicant is required under 35 U.S.C. 121 to elect a ***single*** disclosed species from ***each*** of the following group of species, even though this requirement is traversed.

The groups of species are as follows:

- a) A ***single specific*** species of the plurality of proteins or molecules (such as claims 1, 108-109, and 134-135).
- b) A ***single specific*** species of organism.
- c) A ***single specific*** species of biological activity.
- d) A ***single specific*** species of solid support.
- e) A ***single specific*** species of interaction between the surface of the support and the substance (such as claims 124, and 126-127).
- f) A ***single specific*** species of assaying reagent.
- g) A ***single specific*** species of volumes of the wells.

Art Unit: 1639

h) A *single specific* species of the bottoms shape of the wells.

The species are distinct, each from the other, because each species have different chemical structure and/or physiochemical properties and would be capable of separate manufacture and/or use; and would necessitate different and separately burdensome manual and computer bibliographic and structure searches in both patent and non-patent areas.

For this response to be complete and for search purposes, applicants should provide the chemical structure of elected compounds or composition or species, wherein each specific formula substituents of each of the above identified elected species are defined either by picture, or by expressing the species in terms of the variables of the formula.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1639

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My-Chau T. Tran whose telephone number is 703-305-6999. The examiner is on ***Increased Flex Schedule*** and can normally be reached on Monday: 8:00-2:30; Tuesday-Thursday: 7:30-5:00; Friday: 8:00-3:30.

Art Unit: 1639

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Wang can be reached on 703-306-3217. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1123.
